

Brand Identity Manual

The master logo system for Trikonam, a school of classical Hatha Yoga.

TRIKONAM

VERSION 1.0

MASTER LOGO SYSTEM

CONTENTS

What is in this document

01	The mark	Philosophy and intent
02	Construction	The field, the axis, the triangle, the lotus
03	The logo system	Eleven approved configurations, two optical cuts
04	Clear space and minimum size	How much air, and how small
05	Incorrect usage	Eight things that undo the work
06	Colour	Forest Ink and the palette it belongs to
07	Typography	The wordmark, and the two system faces
08	Backgrounds and photography	Where the mark may stand
09	Accessibility	Measured contrast, and what it permits
10	Production	Print and digital
11	Asset library	What is supplied

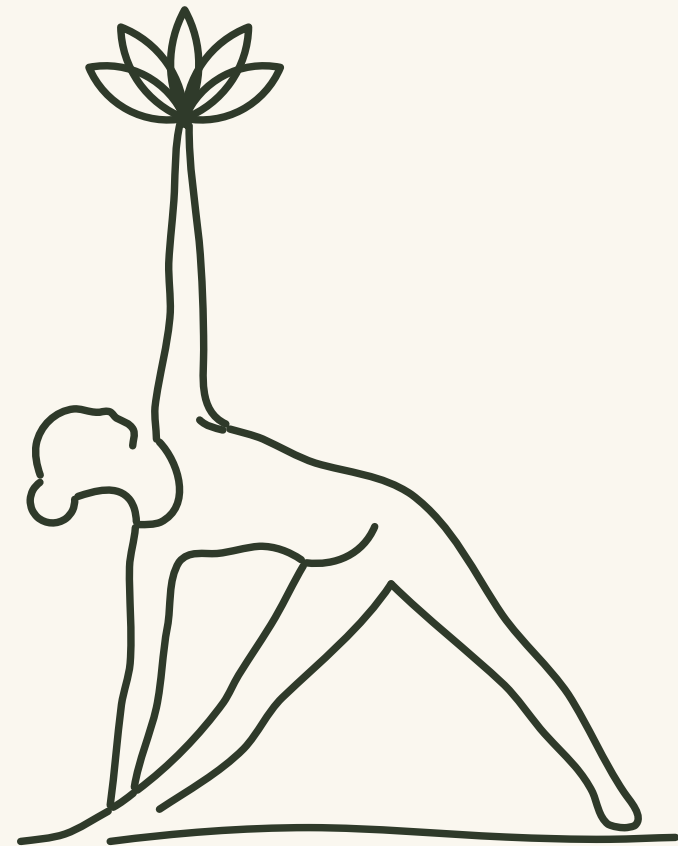

— 01 THE MARK

A figure, a triangle, and a flower opening at the top of a breath

The symbol is a single practitioner in Trikonasana, the triangle posture the school is named for, with a lotus opening from the raised hand.

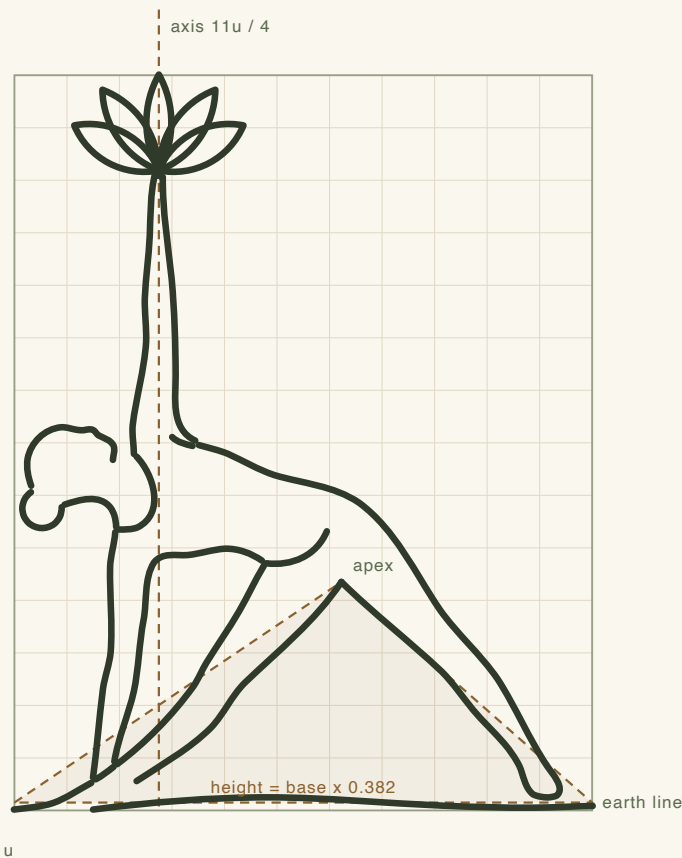

Everything the brand believes is already in the drawing. The two legs and the ground make a triangle, sthira, steadiness, the part of the practice that does not move. Rising from it, on a single vertical, is the extended arm and the lotus, sukha, ease, the part that opens. The mark is that relationship: nothing rises without a base.

It is drawn as one continuous weight of line, the way a posture is held at one continuous effort. No ornament, no shading, no flourish. At large sizes a delicate profile and a hair knot appear; at small sizes they quietly withdraw and the silhouette carries.

— 02 CONSTRUCTION

The geometry was already in the drawing

The mark stands on an 11 by 14 module field. Three relationships govern it, and all three were measured from the founding artwork rather than imposed on it.

THE FIELD

11 wide by 14 high, one module = u. Every element is positioned against this grid, never by eye.

THE AXIS

The lotus and the raised arm share one vertical, standing on the field's quarter line, 11u divided by 4.

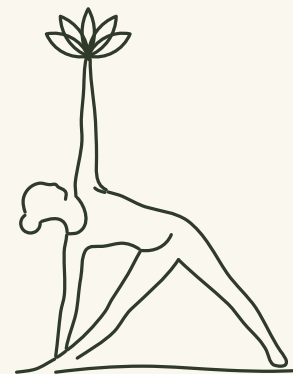

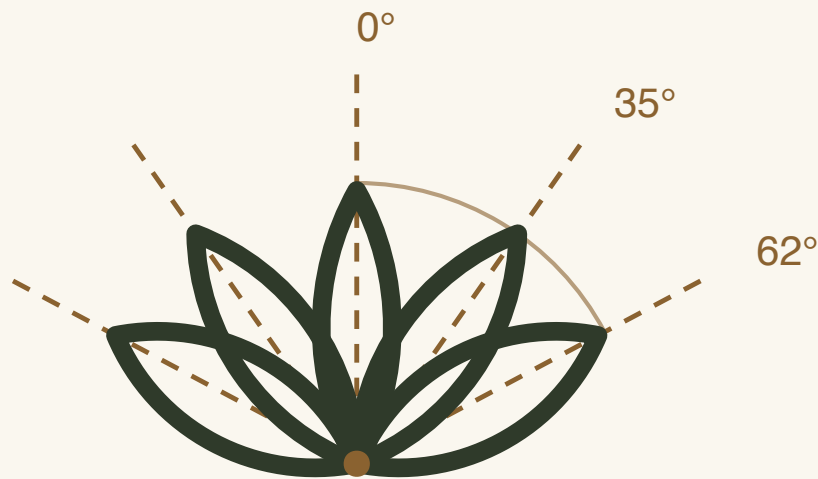

THE TRIANGLE

The legs and the earth line form the base. Its height is its width multiplied by 0.382, the golden section squared. Measured 0.38182 against a true 0.381966.

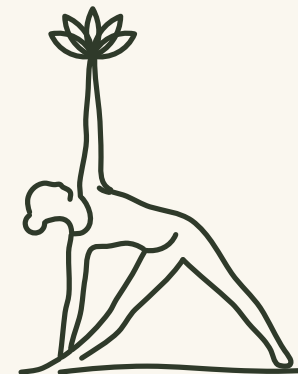

Stroke weight is uniform. The skull and the hair knot are true circles. Nothing in the mark is approximate.

— 02 CONSTRUCTION, CONTINUED

The lotus, and the two optical cuts

Display stroke 10
140 px of symbol height and above

Compact stroke 16
60 to 140 px

Display at 78 px Compact at 78 px

Five petals on the ascending axis at 0, 35 and 62 degrees. Each is a true vesica, two circular arcs struck between the base point and the tip, and the left half is an exact mirror of the right.

One drawing, issued in two weights. The Display stroke is 0.89 per cent of the symbol's height; the Compact stroke is 1.43 per cent. The geometry, the proportions and the curves are identical. Below 140 px of symbol height the Display stroke falls under one device pixel and the mark greys out; the Compact cut is drawn for exactly that range. Below 60 px, use the reduced mark.

— 03 THE LOGO SYSTEM

Eleven approved configurations

Choose by the space available, never by preference. If a lockup is not shown here, it does not exist.

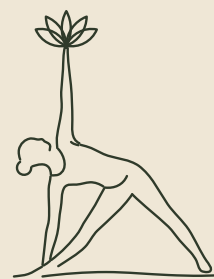

PRIMARY / STACKED

TRIKONAM

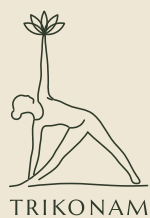

HORIZONTAL

SYMBOL

TRIKONAM

WORDMARK

SQUARE

ROUNDEL

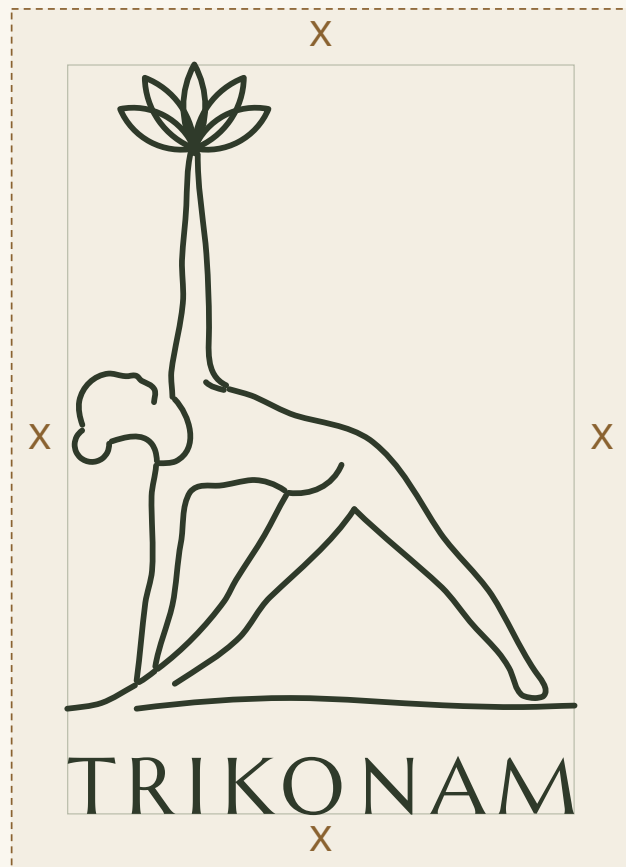

SEAL

REDUCED MARK

— 04 CLEAR SPACE

The mark needs air, and it needs a floor

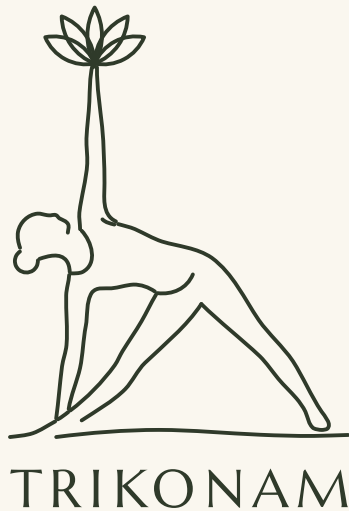

X is the height of the lotus, 0.136 of the symbol's height at whatever size the mark is used. One rule for every lockup, so the margin reads as equal across the whole set. For the wordmark alone, X is its cap height.

Nothing may enter this zone: no type, image, rule, or edge of page. Clear space is a minimum, not a target. Where the layout allows, give the mark more.

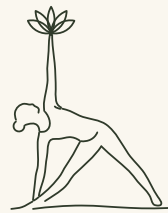

Never place the logo in a coloured box purely to separate it from a background. Change the colourway instead.

— 04 MINIMUM SIZE

How small the mark may go

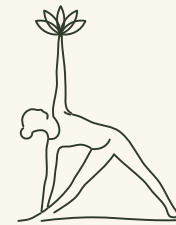

Primary lockup
32 mm / 120 px wide

Horizontal
52 mm / 200 px wide

TRIKONAM

Symbol
16 mm / 60 px wide

TRIKONAM

Wordmark
24 mm / 90 px wide

Reduced mark
6 mm / 16 px

Each is shown at its own minimum, in the optical cut it is approved in. Below these, step down to the next lockup: the primary gives way to the horizontal, the horizontal to the symbol, the symbol to the reduced mark.

On uncoated and recycled stock, expect dot gain to close fine apertures. Step up one lockup from the minimum, and proof before committing to a run.

— 05 INCORRECT USAGE

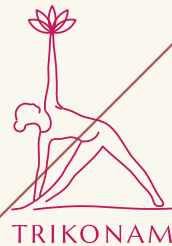

Eight things that undo the work

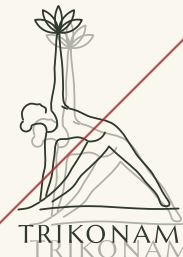

Do not stretch or
condense

Do not rotate

Do not recolour outside
the palette

Do not add shadow, glow
or bevel

Do not place on a busy
image

Do not rearrange the
lockup

Do not outline or stroke
the mark

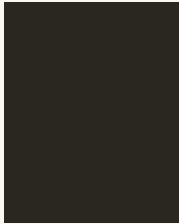

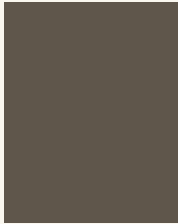

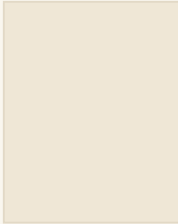

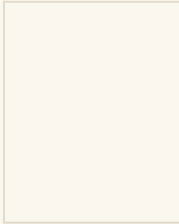

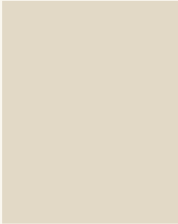

TRIKONAM

Do not alter the spacing
of the wordmark

06 COLOUR

Forest Ink, and the palette it belongs to

The logo's ink is Forest Ink, the school's moss accent taken to its darkest value. It reads as near-black, carries a trace of green, and is at home on warm ivory in a way a true navy never is.

									
Forest Ink	Espresso	Stone	Moss	Moss Deep	Ochre Gold	Gold Leaf	Sand	Ivory	Hairline
#2F3A2A	#2A2620	#5F564B	#5B6B4E	#46543C	#8A6230	#A87C3D	#EFE7D6	#FAF7EF	#E2D9C6
47 58 42	42 38 32	95 86 75	91 107 78	70 84 60	138 98 48	168 124 61	239 231 214	250 247 239	226 217 198
19 0 28 77	0 10 24 84	0 9 21 63	15 0 27 58	17 0 29 67	0 29 65 46	0 26 64 34	0 3 10 6	0 1 4 2	0 4 12 11
5605 C	Neutral Blk C	Warm Gray 11 C	5757 C	5605 C	730 C	872 C	9224 C	9184 C	9225 C

EACH SWATCH READS HEX / RGB / CMYK / PANTONE

CMYK values are unmanaged conversions and a starting point only: always proof on the actual stock. Pantone references are approximations and must be confirmed against a current physical guide before any spot-colour run. Moss is a supporting colour, approved for the logo only in secondary applications. Ochre Gold is a fill colour, never text on ivory.

07 TYPOGRAPHY

A carved wordmark, a warm serif, a quiet sans

THE WORDMARK MARCELLUS, REFINED

TRIKONAM

A Roman inscriptional capital: near-uniform stroke weight, so it shares the symbol's monoline rhythm rather than fighting it. Two refinements make it the brand's own. The letterspacing is optically measured pair by pair, not uniformly tracked. And the apexes of the A and M are drawn to a point, echoing the tips of the lotus petals. Always used as outlines, never set as live type.

PRIMARY FRAUNCES

Steadiness and ease

Headings, titles, pull quotes. Regular and Light only, never bold. Already the voice of the website.

SECONDARY KARLA

Body text and interface

All running text, captions, navigation and small print. No accent typeface is required or permitted.

Display / H1	Fraunces Reg.	-0.01em tracking
Headings	Fraunces Reg.	Sentence case
Body	Karla Reg.	16-18px, 1.7 lead
Labels	Karla Med.	Caps, 0.16em, moss
Quotations	Fraunces Light It.	Indent, no quotes

Where the mark may stand

IVORY

SAND

FOREST INK

ESPRESSO

These four are the whole of it. Ivory and Sand take the mark in Forest Ink; Forest Ink and Espresso take it in Ivory.

Over photography, use the white colourway, and only where the image is quiet: an even, unbusy area with no detail running through the mark. If the mark is not clearly legible at a glance, move it, or place it on a plain panel beside the image. Never place it over faces, hands, or the focal point of a posture. Do not add coloured overlays to force the logo to work.

Legibility, paper, and screens

Every approved pairing clears WCAG AA comfortably. Forest Ink on Ivory measures 11.15:1, and Ivory on Forest Ink the same. Espresso on Ivory is 14.05:1. Moss on Ivory is 5.36:1, sufficient for the logo and large text but not for small body copy. Ochre Gold is a fill colour, approved with ivory text on it, never as text on ivory.

Wherever the logo carries meaning, give it a text alternative. The mark's meaning survives in one colour, so the identity is fully legible to viewers with any form of colour vision deficiency.

ALWAYS SUPPLY VECTOR

PDF, SVG or EPS from the master library. Never a PNG, never artwork lifted from the website.

FOIL AND GILDING

Supply the single-colour master as 100% K. The gold is the foil, not the artwork.

EMBOSS, DEBOSS, ENGRAVING

The Display stroke is too fine for a die. Use the Compact cut, the reduced mark, or the symbol at no less than 16 mm. Minimum engraved stroke 0.15 mm at final size.

SINGLE-COLOUR PRINT

100% K or one spot. Do not screen the ink back to make a lighter logo; use the watermark artwork, which is drawn for it.

DIGITAL

Use SVG wherever the platform allows. The master carries its ink as `currentColor`, so a colourway is one declaration.

— 11 ASSET LIBRARY

What is supplied

01_Master Logos	Ten lockups, Display and Compact cuts	SVG PDF EPS PNG
02_Variations	Eleven colourways of the core lockups	SVG PDF PNG
03_Icons	favicon.ico, 16 to 512, app and avatar icons	ICO SVG PNG
04_Print	Single-colour, reverse, foil, emboss, deboss, engraving	SVG PDF EPS
05_Colours	Palette in ASE, CSS, SCSS, Tailwind, JSON	ASE CSS SCSS JS JSON
06_Typography	Wordmark font, web fonts, specimen, guidance	TTF WOFF2 PDF
07_Web	Header, footer, nav, dark and light, OG and Twitter	SVG PNG
08_Social	Instagram, Facebook, LinkedIn, YouTube, WhatsApp, Google	PNG SVG
09_Office	Signature, letterhead, invoice, certificate, deck	SVG PDF PNG
10_Brand Manual	This document	HTML PDF
11_Source	Construction pipeline, fonts, reference artwork	PY TTF PNG

The master artwork is the single source of truth; this document describes it.
Where the two disagree, the artwork is right.
